Point 40

Add the following text:

<i>Draft opinion</i>	<i>Amendment</i>
	<u>The Committee proposes that a database be developed to help track migration flows between Member States. This database would include information on flows of people from countries of origin to countries of destination. Knowledge of these flows would facilitate decision-making at local, regional and European levels;</u>

Reason

Developing such a database would enable local and regional administrations to intervene in a range of urgent social, family, legal and administrative situations.
